KEYWORD INDEX

A

Acid secretion — The intramembranous particles of resting and secreting gastric (H^+,K^+)-ATPase membranes, 163

Actin — Process or re-establishment of β-adrenergic induced protein secretion after cytochalasin D inhibition in rat parotid gland. Effect of cholinergic agonist, phorbol ester and calcium, 57

Alkaline phosphatase — Expression and characterization of alkaline phosphatases during differentiation of human pancreatic cancer (Capan-1) cells in culture, 15

Angiogenesis — Purification and biological properties of vasculotropin, a new angiogenic cytokine, 1

Asialoglycoprotein-receptor — Vasopressin-induced changes in receptor-mediated endocytosis of asialoglycoprotein in rat hepatocytes, 43

B

β-Adrenergic secretion — Process or re-establishment of β-adrenergic induced protein secretion after cytochalasin D inhibition in rat parotid gland. Effect of cholinergic agonist, phorbol ester and calcium, 57

Babesia divergens — Lipid trafficking between high density lipoproteins and *Babesia divergens*-infected human erythrocytes, 63

Bovine tracheal gland cells — Modulations of the epithelial phenotype and functional activity of cultured bovine tracheal gland cells: dependence on the culture medium and passage number, 49

C

C-*fos* proto-oncogene — Co-expression of the proto-oncogene *FOS* (c-*fos*) and an embryonic interferon (ovine trophoblastin) by sheep conceptuses during implantation, 27

cDNA — Post-transcriptional analysis of rat mitochondrial D-3-hydroxybutyrate dehydrogenase control through development and physiological stages, 121

Cell culture — Expression and characterization of alkaline phosphatases during differentiation of human pancreatic cancer (Capan-1) cells in culture, 15

Cell differentiation — Expression and characterization of alkaline phosphatases during differentiation of human pancreatic cancer (Capan-1) cells in culture, 15

Cellulose — Liquid crystal-type assembly of native cellulose-glucuronoxylans extracted from plant cell wall, 173

Ciliates — Low molecular weight DNA in the heteromeric macronuclei of two cyrtophorid ciliates, 79

Culture medium — Modulations of the epithelial phenotype and functional activity of cultured bovine tracheal gland cells: dependence on the culture medium and passage number, 49

Cytochalasin D — Process or re-establishment of β-adrenergic induced protein secretion after cytochalasin D inhibition in rat parotid gland. Effect of cholinergic agonist, phorbol ester and calcium, 57

Cytokine — Purification and biological properties of vasculotropin, a new angiogenic cytokine, 1 — Human keratinocyte membrane lectins: characterization and modulation of their expression by cytokines, 35

Cytological events — Ultrastructural features of soybean somatic cells at the beginning of an organogenic process: toward a new concept, 99

Cytoskeleton — Cellular and subcellular localization of annexin IV in rabbit intestinal epithelium, pancreas and liver, 151

D

D-3-hydroxybutyrate dehydrogenase — Post-transcriptional analysis of rat mitochondrial D-3-hydroxybutyrate dehydrogenase control through development and physiological stages, 121

Differentiation — Modulations of the epithelial phenotype and functional activity of cultured bovine tracheal gland cells: dependence on the culture medium and passage number, 49

DNA fractionation — Low molecular weight DNA in the heteromeric macronuclei of two cyrtophorid ciliates, 79

DNA-RNA hybrids — Comparative analysis of four parameters involved in puffing activity along chromosome arm 2L of *D melanogaster*, 71

Drosophila — Scaffold-associated regions and repeated or cross-hybridizing sequences on an 800 kilobase DNA stretch of the *Drosophila* X chromosome, 111

E

Eleocyte — Identification of the eleocytes as the vitellogenin producing cells in nereids, 179

Embryonic interferon — Co-expression of the proto-oncogene *FOS* (c-*fos*) and an embryonic interferon (ovine trophoblastin) by sheep conceptuses during implantation, 27

Endocytosis — Vasopressin-induced changes in receptor-mediated endocytosis of asialoglycoprotein in rat hepatocytes, 43 — Fluid phase endocytosis investigated by fluorescence with trimethylamino-diphenylhexatriene in L929 cells; the influence of temperature and of cytoskeleton depolymerizing drugs, 131

Endocytosis and cytoskeleton — Fluid phase endocytosis investigated by fluorescence with trimethylamino-diphenylhexatriene in L929 cells; the influence of temperature and of cytoskeleton depolymerizing drugs, 131

Endocytosis and temperature — Fluid phase endocytosis investigated by fluorescence with trimethylamino-diphenylhexatriene in L929 cells; the influence of temperature and of cytoskeleton depolymerizing drugs, 131

Endothelium — Mammalian cell lines can be efficiently established *in vitro* upon expression of the SV40 large T antigen driven by a promoter sequence derived from the human vimentin gene, 7

Exocytosis — 'Neurosecretion' by synaptic terminals in the locust corpus cardiacum: is non-synaptic exocytosis part of the regulated or the constitutive pathway? 157

Expression — Human keratinocyte membrane lectins: characterization and modulation of their expression by cytokines, 35

F

Foetal and post-natal development — Post-transcriptional analysis of rat

mitochondrial D-3-hydroxybutyrate dehydrogenase control through development and physiological stages, 121
Freeze-fracture — The intramembranous particles of resting and secreting gastric (H^+,K^+)-ATPase membranes, 163
Frog — Effects of low temperature on the formation of secretion granules in the Golgi apparatus of granular cells of the frog urinary bladder, 139

G

Genome organization — Low molecular weight DNA in the heteromeric macronuclei of two cyrtophorid ciliates, 79
Golgi apparatus — Effects of low temperature on the formation of secretion granules in the Golgi apparatus of granular cells of the frog urinary bladder, 139

H

(H^+,K^+)-ATPase — The intramembranous particles of resting and secreting gastric (H^+,K^+)-ATPase membranes, 163
Hepatic and extrahepatic tissues — Post-transcriptional analysis of rat mitochondrial D-3-hydroxybutyrate dehydrogenase control through development and physiological stages, 121
Hepatocytes — Vasopressin-induced changes in receptor-mediated endocytosis of asialoglycoprotein in rat hepatocytes, 43
Heteromeric macronucleus — Low molecular weight DNA in the heteromeric macronuclei of two cyrtophorid ciliates, 79
High density lipoproteins — Lipid trafficking between high density lipoproteins and *Babesia divergens*-infected human erythrocytes, 63

I

Image analyser — Quasi-real time digital stereology in electron microscopy, 107
Image analysis — Quantitative immunolocalization of four immunodominant antigens of *Toxoplasma gondii*, 89
Immortalization — Mammalian cell lines can be efficiently established *in vitro* upon expression of the SV40 large T antigen driven by a promoter sequence derived from the human vimentin gene, 7
Immunoblotting — Post-transcriptional analysis of rat mitochondrial D-3-hydroxybutyrate dehydrogenase control through development and physiological stages, 121
Immunocytochemistry — Quantitative immunolocalization of four immunodominant antigens of *Toxoplasma gondii*, 89
Immunodominant antigen — Quantitative immunolocalization of four immunodominant antigens of *Toxoplasma gondii*, 89
Immunofluorescence — Cellular and subcellular localization of annexin IV in rabbit intestinal epithelium, pancreas and liver, 151
Implantation — Co-expression of the proto-oncogene *FOS* (c-*fos*) and an embryonic interferon (ovine trophoblastin) by sheep conceptuses during implantation, 27
Intramembranous particles — The intramembranous particles of resting and secreting gastric (H^+,K^+)-ATPase membranes, 163

K — L

Keratinocyte — Human keratinocyte membrane lectins: characterization and modulation of their expression by cytokines, 35

Lectin — Human keratinocyte membrane lectins: characterization and modulation of their expression by cytokines, 35
Lipid transfer — Lipid trafficking between high density lipoproteins and *Babesia divergens*-infected human erythrocytes, 63
Lipocortin — Cellular and subcellular localization of annexin IV in rabbit intestinal epithelium, pancreas and liver, 151
Liquid-crystal — Liquid crystal-type assembly of native cellulose-glucuronoxylans extracted from plant cell wall, 173
Locust — 'Neurosecretion' by synaptic terminals in the locust corpus cardiacum: is non-synaptic exocytosis part of the regulated or the constitutive pathway? 157

M

Membrane fluidity — Fluid phase endocytosis investigated by fluorescence with trimethylamino-diphenylhexatriene in L929 cells; the influence of temperature and of cytoskeleton depolymerizing drugs, 131
Monoclonal antibody — Identification of the eleocytes as the vitellogenin producing cells in nereids, 179
Morphometric quantitation — Quantitative immunolocalization of four immunodominant antigens of *Toxoplasma gondii*, 89
Morphometry — The intramembranous particles of resting and secreting gastric (H^+,K^+)-ATPase membranes, 163
mRNA level — Post-transcriptional analysis of rat mitochondrial D-3-hydroxybutyrate dehydrogenase control through development and physiological stages, 121

N

Nereid — Identification of the eleocytes as the vitellogenin producing cells in nereids, 179
Neuropeptides — 'Neurosecretion' by synaptic terminals in the locust corpus cardiacum: is non-synaptic exocytosis part of the regulated or the constitutive pathway? 157

O

Ovine trophoblastin — Co-expression of the proto-oncogene *FOS* (c-*fos*) and an embryonic interferon (ovine trophoblastin) by sheep conceptuses during implantation, 27

P

Pancreatic ductal cancer cells — Expression and characterization of alkaline phosphatases during differentiation of human pancreatic cancer (Capan-1) cells in culture, 15
Parotid gland — Process or re-establishment of β-adrenergic induced protein secretion after cytochalasin D inhibition in rat parotid gland. Effect of cholinergic agonist, phorbol ester and calcium, 57
Passage number — Modulations of the epithelial phenotype and functional activity of cultured bovine tracheal gland cells: dependence on the culture medium and passage number, 49
Phosphatidylcholine — Lipid trafficking between high density lipoproteins and *Babesia divergens*-infected human erythrocytes, 63
Phospholipids — Lipid trafficking between high density lipoproteins and *Babesia divergens*-infected human erythrocytes, 63
Plasma membrane — Cellular and subcellular localization of annexin IV in rabbit intestinal epithelium, pancreas and liver, 151
Polarity — Cellular and subcellular localization of annexin IV in rabbit intestinal epithelium, pancreas and liver, 151
Polytene chromosomes — Comparative analysis of four parameters involved in puffing activity along chromosome arm 2L of *D melanogaster*, 71

Protoplasts — Ultrastructural features of soybean somatic cells at the beginning of an organogenic process: toward a new concept, 99
Puffing — Comparative analysis of four parameters involved in puffing activity along chromosome arm 2L of *D melanogaster*, 71

Q

Quince — Liquid crystal-type assembly of native cellulose-glucuronoxylans extracted from plant cell wall, 173

R

rDNA — Low molecular weight DNA in the heteromeric macronuclei of two cyrtophorid ciliates, 79
Regeneration — Ultrastructural features of soybean somatic cells at the beginning of an organogenic process: toward a new concept, 99
Repeated sequences — Scaffold-associated regions and repeated or cross-hybridizing sequences on an 800 kilobase DNA stretch of the *Drosophila* X chromosome, 111
RNA polymerase II — Comparative analysis of four parameters involved in puffing activity along chromosome arm 2L of *D melanogaster*, 71

S

Scaffold attached regions — Scaffold-associated regions and repeated or cross-hybridizing sequences on an 800 kilobase DNA stretch of the *Drosophila* X chromosome, 111
Secretion granules — Effects of low temperature on the formation of secretion granules in the Golgi apparatus of granular cells of the frog urinary bladder, 139
Self-assembly — Liquid crystal-type assembly of native cellulose-glucuronoxylans extracted from plant cell wall, 173
Soybean — Ultrastructural features of soybean somatic cells at the beginning of an organogenic process: toward a new concept, 99
Stereology — Quasi-real time digital stereology in electron microscopy, 107
Steroid control — Post-transcriptional analysis of rat mitochondrial D-3-hydroxybutyrate dehydrogenase control through development and physiological stages, 121
SV40 — Mammalian cell lines can be efficiently established *in vitro* upon expression of the SV40 large T antigen driven by a promoter sequence derived from the human vimentin gene, 7
Synapse — 'Neurosecretion' by synaptic terminals in the locust corpus cardiacum: is non-synaptic exocytosis part of the regulated or the constitutive pathway? 157

T

Temperature — Effects of low temperature on the formation of secretion granules in the Golgi apparatus of granular cells of the frog urinary bladder, 139
Tissue regeneration — Purification and biological properties of vasculotropin, a new angiogenic cytokine, 1
TMA-DPH — Fluid phase endocytosis investigated by fluorescence with trimethylamino-diphenylhexatriene in L929 cells; the influence of temperature and of cytoskeleton depolymerizing drugs, 131
Toxoplasma gondii — Quantitative immunolocalization of four immunodominant antigens of *Toxoplasma gondii*, 89
Transmission electron microscopy — Quasi-real time digital stereology in electron microscopy, 107

U

Uridine incorporation — Comparative analysis of four parameters involved in puffing activity along chromosome arm 2L of *D melanogaster*, 71
Urinary bladder — Effects of low temperature on the formation of secretion granules in the Golgi apparatus of granular cells of the frog urinary bladder, 139

V

Vasculotropin — Purification and biological properties of vasculotropin, a new angiogenic cytokine, 1
Vasopressin — Vasopressin-induced changes in receptor-mediated endocytosis of asialoglycoprotein in rat hepatocytes, 43
Vimentin gene — Mammalian cell lines can be efficiently established *in vitro* upon expression of the SV40 large T antigen driven by a promoter sequence derived from the human vimentin gene, 7
Vitellogenin — Identification of the eleocytes as the vitellogenin producing cells in nereids, 179

X

Xylans — Liquid crystal-type assembly of native cellulose-glucuronoxylans extracted from plant cell wall, 173
